Visualization Tool for Electric Vehicle Charge and Range Analysis

1.Introduction

The Electric vehicles industry at a nascent stage. It is less than 1% of the total vehicle sales. However has the potential to grow to more than 5% in few years.

The supply of fossil fuels keeps on depreciating the scenario is very critical and hence it is the right time for the world to slowly adapt to electric vehicles. A transformation is very essential. Hence awareness about the electric vehicle must be established to the public.

The purpose of the project is to analyse about the electric vehicle their advantages, disadvantages and to know about the companies that are manufacturing electric vehicles and to categorise them according to their features to know about their efficiency and reliability.
